ANALYSIS MATHEMATICA

INDEX 11—20
1985—1994

Agaev, I., Lacunary subsets of orthonormal sets ..... **11**(1985) 283–301
Agbeko, N. K. On an inequality of Longnecker and Serfling ..... **17**(1991) 3–9
Alvarez, H. and *Zó F.*, On the best L^p multipoint local approximation ..... **11**(1985) 187–191
Amanov, N. T., On the uniform weighted approximation by Szász–Mirakjan operators ..... **18**(1992) 167–184
Andersson J.-E., Rational approximation to functions like x^α in integral norms ..... **14**(1988) 11–25
Andrienko, V. A., On the rate of Cesàro summability of orthogonal series ..... **15**(1989) 263–281
Andrievskiĭ, V. V., On the analogue of a de la Vallée Poussin's problem for arcs in the complex plane ..... **11**(1985) 303–309
Aragona, J. and *Biagioni, H. A.*, Intrinsic definition of the Colombeau algebra of generalized functions ..... **17**(1991) 75–132
Arató N. and *Márkus L.*, On the solution of a Schrödinger-type equation ..... **12**(1986) 307–312
Arestov, V. V., Integral inequalities for algebraic polynomials with a restriction on their zeros ..... **17**(1991) 11–20
Arkhipov, G. I., Sadovnichiĭ, V. A. and *Chubarikov, V. N.*, A generalization of the Heine limit for functions which converge on a base ..... **20**(1994) 161–171
Artikis, T. and *Voudouri, A.*, Limiting behaviour of certain mixtures of distributions ..... **16**(1990) 81–86
Babenko V. F., Approximations, widths and optimal quadrature formulae for classes of periodic functions with rearrangement invariant sets of derivatives ..... **13**(1987) 281–306
Baiborodov, S. P., Approximation of conjugate functions by Fourier sums in $L^p_{2\pi}$ ..... **11**(1985) 3–12
Bajpai, S. D., Some expansion formulae for Fox's H-function of two variables involving associated Legendre functions ..... **19**(1993) 3–12
Bakhshetsyan A. V., On rearrangements of orthogonal sets ..... **14**(1988) 157–174
Baron, S. und *Tietz, H.*, Produktsätze für Verfahren zur Limitierung von Doppelfolgen ..... **20**(1994) 81–94
Belinskiĭ, E. S., Approximation of functions of several variables by trigonometric polynomials with given number of harmonics, and estimates of ε-entropy ..... **15**(1989) 67–74
Belov, A. S., On some local properties of the sum of lacunary trigonometric series ..... **14**(1988) 65–97
Bennett, G., Majorization versus power majorization ..... **12**(1986) 283–286
Biagioni, H. A. and *Aragona, J.*, Intrinsic definition of the Colombeau algebra of generalized functions ..... **17**(1991) 75–132

Biebler, K.-E., Fortsetzungssätze und Moduln über Semifields ..... **15**(1989) 75–104
Bloshanskiĭ, I. L., On the existence of functions from L_p, $p \geq 1$, whose Fourier series converge to zero on a prescribed set and diverge unboundedly outside it ..... **14**(1988) 139–155
Bui Khoi Dam, The dual of the martingale Hardy space $\mathcal{H}_\phi$ with general Young function Φ ..... **14**(1988) 287–294
Carl, B. and *Makai, E. Jr.*, New covering numbers and spectral properties of operators in Banach spaces ..... **17**(1991) 183–209
Castillo, E. and *Galambos, J.*, Bivariate distributions with Weibull conditionals ..... **16**(1990) 3–9
Chakraborty, N. D. and *Roy, S. K.*, Orlicz spaces for a family of measures ..... **12**(1986) 229–235
Chandra, P. and *Dikshit, G. D.*, The absolute generalized harmonic-Cesàro summability of a Fourier series ..... **20**(1994) 173–183
Chubarikov, V. N., Arkhipov, G. I. and *Sadovnichiĭ, V. A.*, A generalization of the Heine limit for functions which converge on a base ..... **20**(1994) 161–171
Csordás G. and *Vincze I.*, Convexity properties of power series with logarithmically s-convex coefficients ..... **18**(1992) 3–13
Człapiński, T., On some nonlinear Volterra integral-functional equation in several variables ..... **20**(1994) 241–253
Daróczy Z. and *Kátai I.*, Additive functions ..... **12**(1986) 85–96
——— and *Kátai I.*, Continuous additive functions and difference equations of infinite order ..... **12**(1986) 237–249
Demenko, V. N., On p-Helson sets in R^n ..... **15**(1989) 17–35
Dikshit, G. D. and *Chandra, P.*, The absolute generalized harmonic-Cesàro summability of a Fourier series ..... **20**(1994) 173–183
Ditzian, Z. and *Ivanov, K. G.*, Minimal number of significant directional moduli of smoothness ..... **19**(1993) 13–27
D'yachenko, M. I., Multiple trigonometric series with lexicographically monotone coefficients ..... **16**(1990) 173–190
Dolzhenko, E. P. and *Makhmudov, Kh. M.*, On rational approximations of the functions of complex variable integrable over plane domains ..... **16**(1990) 257–264
Dunham, C. B., Discretization with interpolating approximation .. **13**(1987) 41–44
Dutta, T. K. and *Mukhopadhyay, S. N.*, On the Riemann derivatives of $C_\alpha P$-integrable functions ..... **15**(1989) 159–174
D'yačkov, A. M., Conditions for the existence of Stieltjes integral of functions of bounded generalized variation ..... **14**(1988) 295–313
Dzhafarov, Ar. S., Bernstein inequality for differential operators ... **12**(1986) 251–268
Dzhrbashyan, M. M. and *Martirosyan, V. M.*, Integral representations for some classes of functions holomorphic in a strip or in a half plane ..... **12**(1986) 191–212
Eneduanya, S. A. N., On the convergence of interpolation polynomials ..... **11**(1985) 13–22
Franke, J. and *Runst, T.*, On the admissibility of function spaces of type $B^s_{p,q}$ and $F^s_{p,q}$ and boundary value problems for non-linear partial differential equations ..... **13**(1987) 3–27
Galambos, J. and *Castillo, E.*, Bivariate distributions with Weibull conditionals ..... **16**(1990) 3–9
Ganzburg, M. I., Limit theorems in approximation theory ..... **18**(1992) 37–57
Gaposhkin, V. F., On the Cesàro summability of orthogonal sequences ..... **11**(1985) 193–199
———, Summation of weakly dependent sequences by Cesàro methods ..... **13**(1987) 269–279

Garcia, J.B., Interpolation of weighted Orlicz-valued function spaces **19**(1993) 191–215
Georgiou, J. E. and *Mařik, J.*, On a class of orthogonal series ..... **16**(1990) 11–25
Getsadze, R. D., On the convergence and divergence of multiple Fourier series with respect to the Walsh–Paley system in the spaces C and L ..... **13**(1987) 29–39
Gevorkian, G. G., On U_ϕ-sets of trigonometric integrals ..... **12**(1986) 185–190
———, On coefficients of null-series and sets of uniqueness of trigonometric and Walsh systems ..... **14**(1988) 219–251
Giang, D. V., On the exactness of a theorem of G. A. Fomin ..... **17**(1991) 133–140
——— and *Móricz F.*, On the integrability of trigonometric series **18**(1992) 15–23
Gleizer, E. V. and *Gol'dberg, A. A.*, On an extremal problem connected with the harmonic measure ..... **11**(1985) 23–28
Gol'dberg, A. A. and *Gleizer, E. V.*, On an extremal problem connected with the harmonic measure ..... **11**(1985) 23–28
Gompa, R. R., On the notion of measurability ..... **18**(1992) 59–62
Grigorian, M. G., On the almost everywhere convergence of double Fourier series of integrable functions ..... **11**(1985) 201–216
———, On the convergence of Fourier series in the metric of L^1 **17**(1991) 211–237
Gurielashvili, R. I., On the Hilbert transform ..... **13**(1987) 121–137
Han, W., Notes on best constants in some Sobolev inequalities .... **20**(1994) 3–10
Harris, D. C., Sets of uniqueness and closed subgroups in Vilenkin groups ..... **16**(1990) 115–122
Indlekofer, K.-H., On some spaces of arithmetical functions. I. .... **18**(1992) 203–221
Ivanov, K. G. and *Sharma A.*, Converse results on equiconvergence of interpolating polynomials ..... **14**(1988) 185–192
——— and *Ditzian, Z.*, Minimal number of significant directional moduli of smoothness ..... **19**(1993) 13–27
Jain, P. K. and *Sinha, D. P.*, On Markuševič decompositions of Banach spaces ..... **16**(1990) 265–275
Karagulian, G. A., On the convergence to infinity of Fourier series along dense subsequences of numbers ..... **18**(1992) 249–259
Kátai I. and *Daróczy Z.*, Additive functions ..... **12**(1986) 85–96
——— and *Daróczy Z.*, Continuous additive functions and difference equations of infinite order ..... **12**(1986) 237–249
Kazarjan K. S., Summability of generalized Fourier series and Dirichlet's problem in $L^p(d\mu)$ and weighted H_p-spaces $(p > 1)$ ..... **13**(1987) 173–197
Kerman, R. A., Weighted restriction theorems for Bessel potentials **14**(1988) 3–9
Kirchhoff, N., *Nessel, R. J.* and *van Wickeren, E.*, Quantitative condensation of singularities for convolution processes of Fejér-type ..... **16**(1990) 191–201
Klotz, L., A matrix generalization of a theorem of Szegő ..... **18**(1992) 63–72
Koncz K., On the parameter estimation of diffusional type processes with constant coefficients (Elementary Gaussian Processes) ... **12**(1986) 75–91
Korobeinik, Yu. F., On shifts of sequences ..... **12**(1986) 167–173
———, Nontrivial expansions of zero and absolutely representing systems ..... **18**(1992) 261–281
Krasichkov-Ternovskiĭ, I. F., Spectral synthesis on a system of unbounded domains starshaped in a common direction ..... **19**(1993) 217–223
Kroó, A. and *Peherstorfer, F.*, On the asymptotic distribution of oscillation points in rational approximation ..... **19**(1993) 225–232
Kudryavtsev, L. D., On norms in weighted spaces of functions given on infinite intervals ..... **12**(1986) 269–282
———, Criterion of polynomial increase of a function and its derivatives ..... **18**(1992) 223–236

Kuprikov, Yu. E., On the order of Fourier coefficients in the sense of Cesàro means ... **19**(1993) 113–134
Ky, N. X., Some imbedding theorems concerning the moduli of Ditzian and Totik ... **19**(1993) 255–265
——— and *Schipp F.*, On strong summability of polynomial expansions ... **12**(1986) 115–127
Lapin, S. V., Imbedding theorems for generalized Hölder classes of one variable ... **11**(1985) 29–54
Le Gac., B., Blocks of orthogonal random variables and the strong law of large numbers ... **18**(1992) 103–109
Leindler L., Sharpening of Stečkin's theorem to strong approximation ... **16**(1990) 27–38
———, Generalizations of some theorems of Hardy and Littlewood concerning power series and moment constants ... **19**(1993) 135–149
———, Some inequalities of Hardy–Littlewood type ... **20**(1994) 95–106
———, On power series with positive coefficients ... **20**(1994) 205–211
———, On two theorems of Hardy and Littlewood concerning moment constants ... **20**(1994) 255–262
——— and *Meir, A.*, Sharpening of Stečkin's theorem to strong approximation with exponent p ... **18**(1992) 111–125
Leladze, D. V., On summability of subsequences of partial sums of trigonometric Fourier series ... **17**(1991) 281–295
Leont'eva, T. A., Estimate of a polynomial in generalized exponential functions in the convex hull of two domains ... **14**(1988) 99–109
Liflyand, E. R., On asymptotics of Fourier transform for functions of certain classes ... **19**(1993) 151–168
Liptser, R. S. and *Shiryaev, A. N.*, On contiguity of probability measures corresponding to semi-martingales ... **11**(1985) 93–124
London, R. R., Derivatives of the maximum modulus of a starlike function ... **19**(1993) 39–52
Luers, H., On Riesz means with respect to a cylindric distance function ... **14**(1988) 175–184
Lukomskiĭ, S. F., On a U-set for multiple Walsh series ... **18**(1992) 127–138
Mahato, A. K. and *Maindwal, R.*, Inversion and structure formulae for a generalized Laplace transform ... **19**(1993) 233–241
——— and *Saksena, K. M.*, A generalized Laplace transform of generalized functions ... **18**(1992) 139–151
Maiorov, V. E., On a multiplicative inequality for derived functions **15**(1989) 115–125
Makai, E. Jr. and *Carl, B.*, New covering numbers and spectral properties of operators in Banach spaces ... **17**(1991) 183–209
Makhmudov, Kh. M. and *Dolzhenko, E. P.*, On rational approximations of the functions of complex variable integrable over plane domains ... **16**(1990) 257–264
Manhas, J. S. and Singh, R. K., Invertible weighted composition operators on weighted function spaces ... **20**(1994) 283–294
Mařik, J. and *Georgiou, J. E.*, On a class of orthogonal series ... **16**(1990) 11–25
Márkus L. and *Arató N.*, On the solution of a Schrödinger-type equation ... **12**(1986) 307–312
Martirosyan, V. M. and *Dzhrbashyan, M. M.*, Integral representations for some classes of functions holomorphic in a strip or in a half plane ... **12**(1986) 191–212
Meaney, C., Transferring estimates for zonal convolution operators **15**(1989) 175–193
Megrabian, R. M., On a characteristic of random matrices connected with unconditional convergence almost everywhere ... **14**(1988) 37–47

Meir, A. and *Leindler L.*, Sharpening of Stečkin's theorem to strong approximation with exponent p ... **18**(1992) 111–125
Merzlyakov, S. G., Spectral synthesis for Euler type operators ... **15**(1989) 3–16
Mikosch, T., On a problem of Tandori ... **14**(1988) 315–322
———, Almost sure behavior of tail series in functional spaces ... **16**(1990) 123–133
Móricz F., The order of magnitude of the arithmetic means of double orthogonal series ... **11**(1985) 125–137
———, Strong approximation by rectangular partial sums of double orthogonal series ... **13**(1987) 307–319
———, On the maximum of the rectangular partial sums of double trigonometric series with nonnegative coefficients ... **15**(1989) 283–290
———, Integrability of double trigonometric series with special coefficients ... **16**(1990) 39–56
———, The Cantor–Lebesgue and Denjoy–Luzin properties for double systems of functions ... **17**(1991) 297–305
——— and *Giang, D. V.*, On the integrability of trigonometric series ... **18**(1992) 15–23
——— and *Totik V.*, Pointwise convergence of multiple Fourier series using different convergence notions ... **12**(1986) 49–57
Mursaleen, A note on F_B-convergence ... **13**(1987) 169–172
Mukhopadhyay, S. N. and *Dutta, T. K.*, On the Riemann derivatives of C_sP-integrable functions ... **15**(1989) 159–174
——— and *Pal, B. K.*, The Cesàro–Denjoy–Bochner scale of almost periodicity ... **17**(1991) 307–331
Nessel, R. J., Kirchhoff, N. and *van Wickeren, E.*, Quantitative condensation of singularities for convolution processes of Fejér-type ... **16**(1990) 191–201
Nevai, P. and *Totik V.*, Sharp Nikolskii inequalities with exponential weights ... **13**(1987) 261–267
Novikov, S. I., On some problems of interpolation by L-splines ... **18**(1992) 73–86
Nurpeisov, R. Zh., On the uniform $(C,1)$-summability of Fourier series and integrability of series with respect to multiplicative orthonormal systems ... **15**(1989) 127–143
Ôhashi, K., Central limit theorems for Walsh series with general gaps **20**(1994) 11–25
Osipenko, K. Yu., On optimal extrapolation and interpolation of fuzzy analytic functions ... **13**(1987) 199–210
———, On the Lebesgue constants for interpolation of analytic functions ... **16**(1990) 277–289
Oskolkov, K. I., Inequalities of the "large sieve" type and applications to trigonometric approximation ... **12**(1986) 143–166
Pal, B. K. and *Mukhopadhyay, S. N.*, The Cesàro–Denjoy–Bochner scale of almost periodicity ... **17**(1991) 307–331
Pál L. G., A constructive method for uniform approximation by means of integrated Lagrange interpolation polynomials in the space $C^1[a,b]$ ... **20**(1994) 27–34
Papageorgiou, N. S., Radon–Nikodym theorems for multimeasures and transition multimeasures ... **17**(1991) 141–152
———, Convergence theorems for set-valued martingales and semimartingales ... **18**(1992) 283–293
Pathak, R. S. and *Sahoo, H. K.*, A generalization of H_μ-spaces and Hankel transforms ... **12**(1986) 129–142
Peherstorfer, F. and *Kroó A.*, On the asymptotic distribution of oscillation points in rational approximation ... **19**(1993) 225–232
Pichugov, S. A., Translation invariant operators in linear metric spaces ... **18**(1992) 237–248

Potapov, M. K. and *Tankaeva, S. K.*, On approximation of functions on the half-line by algebraic polynomials ..... **20**(1994) 107–115
Prestin, J., On the approximation by de la Vallée Poussin sums and interpolatory polynomials in Lipschitz norms ..... **13**(1987) 251–259
Privalov, A. A., On the divergence of Lagrange interpolation processes on a set of second category ..... **13**(1987) 139–152
Quak, E., L_p-error estimates for positive linear operators using the second-order τ modulus ..... **14**(1988) 259–272
Quek, T. S. and *Yap, L. Y. H.*, Fourier transform of functions in Herz spaces of certain groups ..... **11**(1985) 179–186
Ramazanov, A.-R. K., On approximation of functions in terms of Φ-variation ..... **20**(1994) 263–281
Rodin, V. A., The space BMO and strong means of Fourier series . **16**(1990) 291–302
———, Totik's conjecture for Chrestenson and Walsh systems .. **18**(1992) 295–305
Roy, S. K. and *Chakraborty, N. D.*, Orlicz spaces for a family of measures ..... **12**(1986) 229–235
Runst, T., Mapping properties of non-linear operators in spaces of Triebel–Lizorkin and Besov type ..... **12**(1986) 313–346
——— and *Franke, J.*, On the admissibility of function spaces of type $B^s_{p,q}$ and $F^s_{p,q}$ and boundary value problems for non-linear partial differential equations ..... **13**(1987) 3–27
Rustamov, Kh. P., On the smoothness of the symbol of multidimensional singular integral operators ..... **13**(1987) 93–119
